

HYDROES CONFERENCE

29-30, January 2019

ENSE 3 – Grenoble, France

Dear Madam, Dear Sir,

A major element of the **HYDROES 2019** event will be the Exhibition, running for two days alongside the conference and in the hall besides the session rooms. The spacious, exhibition pavilion will be the main hub for business networking, between delegates and the industry representatives who will be exhibiting their supplies, products and services.

Meet your business partners, clients, suppliers and service providers. Participants of this conference typically are suppliers, engineering companies and other service providers; operators; investors and researchers.

Lunch and refreshments will be served in the exhibition pavilions, with catering points arranged to ensure that delegates will move around the whole area regularly during the two days. The pavilion will remain open for a networking event after the conference sessions on day two, to provide extra opportunities for business meet-ups in an informal atmosphere. Stands are sold, and multiple units can be combined to create larger displays. Sponsorship packages are available for various items associated with the event.

Details of the application process regarding your opportunities as exhibitor/sponsor can be found on the dedicated web page of the event, and / or you may get in touch directly with the SHF office;

***The best way of making your company stand out among competitors
& to make valuable contacts !***

YOUR MAIN BENEFITS AS EXHIBITOR / SPONSOR

- Opportunity to make contacts with the major players in the hydro sector
